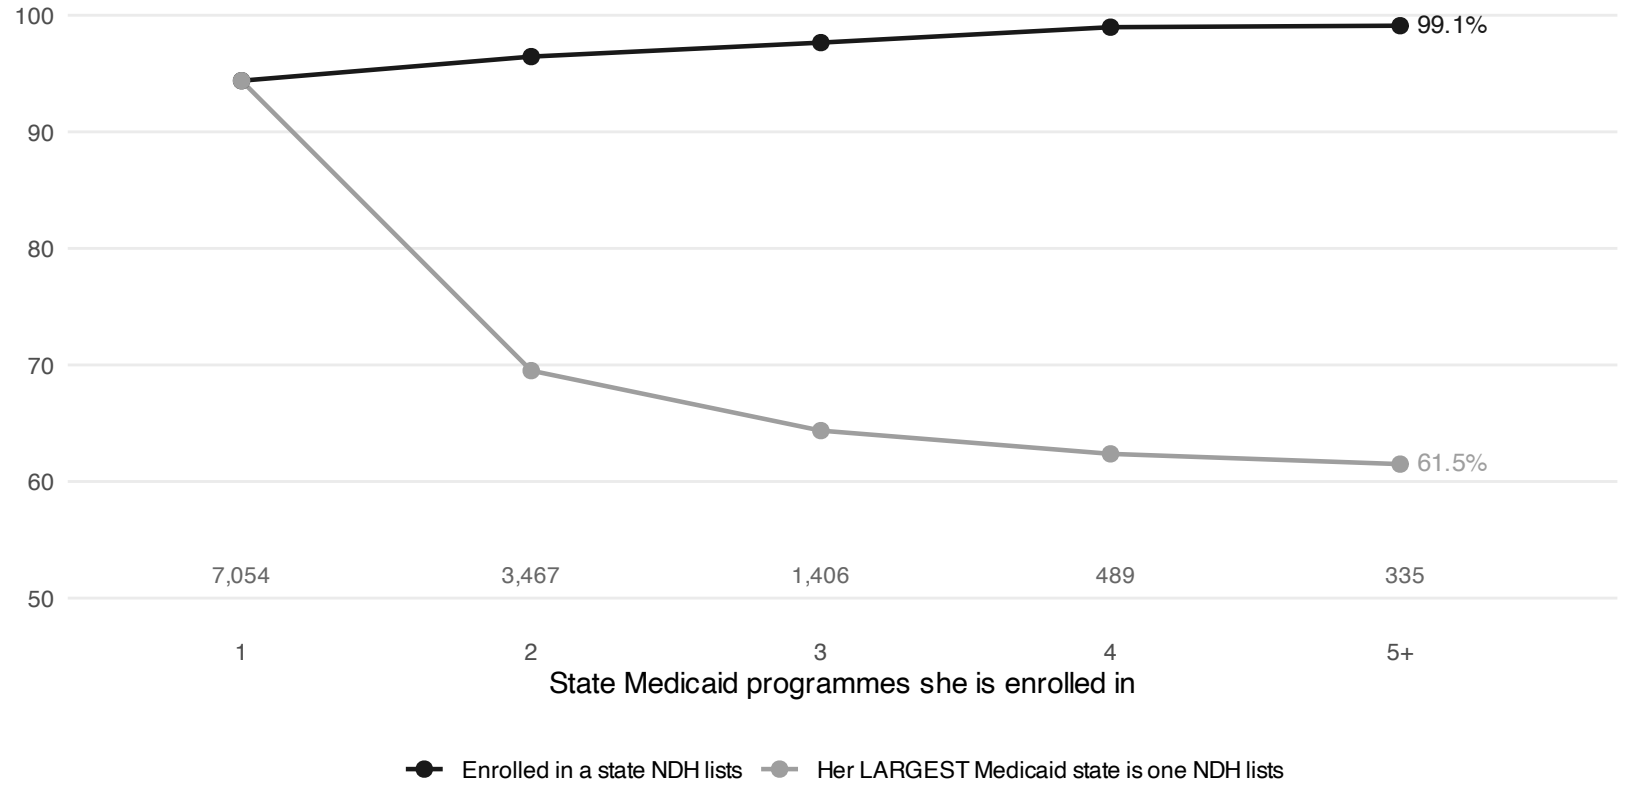
## Same records, two questions, a 38-point gap

Asked whether a midwife is enrolled in Medicaid somewhere CMS's directory lists her, the answer barely moves with how many states she works in. Asked whether her LARGEST Medicaid state is one of them, it falls away -- because reducing a multi-state provider to one state is a choice the comparison makes.



artifacts/medicaid_vs_ndh_state_reduction.csv; counts below each point are midwives. NDH is treated as a set of states, not reduced to one.
